THE GLASGOW EFFECT?

4

THE GLASGOW EFFECT?

~~GLASGOW HAS
A SERIOUS
PROBLEM~~

Wellness not illness— Why 'place' matters for health

The reality is that a 'complete state of physical, mental and social well-being' seldom receives an overt discussion or promotion.

Rarely do briefs for infrastructure require the creation of an environment that supports wellbeing.

Growing Awareness—
How green consciousness can
change perceptions and places

Brian Evans & Sue Evans (editors)

As a society, we focus on illness when we should be thinking more about wellness.

— 1

These images help to illustrate what wellness means in terms of peoples' perception of the built environment and the impact that it has on individual feelings of space, safety and wellbeing.

a Imagine being transferred to this place – your home for the foreseeable future, seven days a week. Does it provoke a feeling of wellbeing?

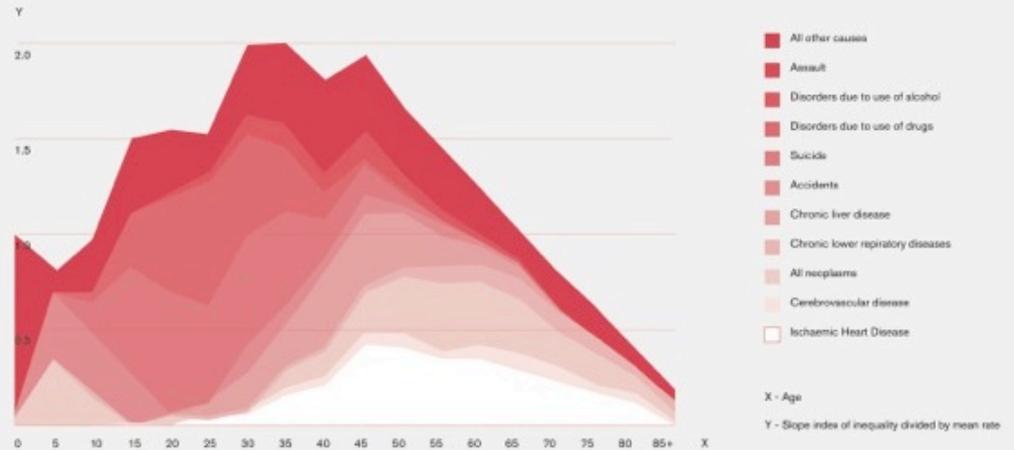

b Somewhere to go or somewhere to drown your sorrows? That's what happens when people live in a place they don't like; they turn to other things to make them feel better.

c Better? No one completely understands why trees and nature make people feel better but they do and it is also a sign that someone cares for the area.

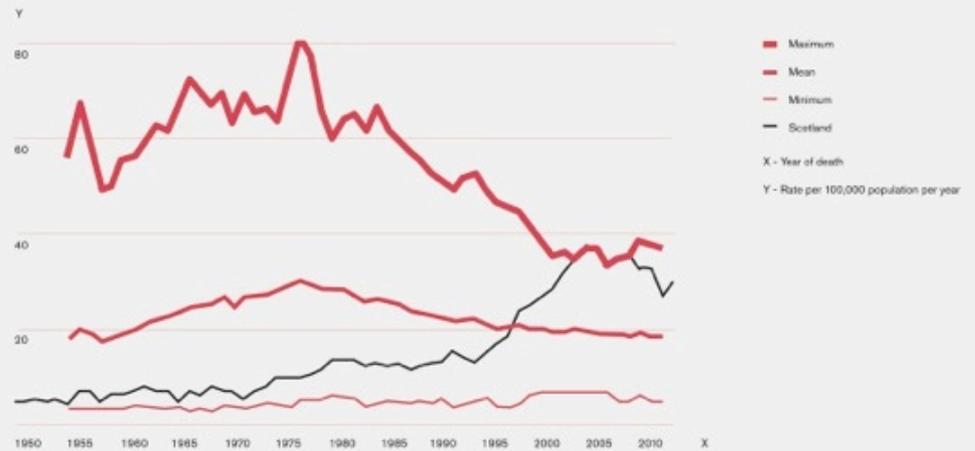

d There are people walking and they are relaxed, the area is safe and there are opportunities for social interaction. The area sends out a message of a community that cares about itself and its place.

Scotland's poor health is a reflection of the health of the poorest in our society.

Inequality in life expectancy in our society is primarily driven by the mortality of teenagers and young working-age people.

— 2
Relative inequalities in mortality by cause – men, Scotland 2000–2002.

— 3
Mortality from chronic liver disease, including cirrhosis, age standardised rates among men 15–74 years old. Scotland in the context of maximum, minimum and mean rates for 16 European Countries.

The new towns of the Clyde Valley Plan caused mass relocation of people in the 1960s and 1970s. We now know this social and economic turmoil has had biological consequences.

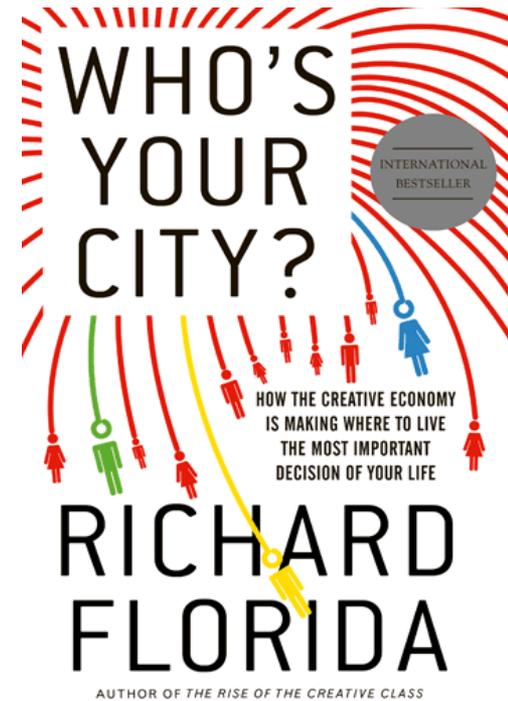

In the most deprived parts of society people are told where to go and what to do. They are not in control of their lives. This does not promote wellness.

"Those who have a 'why' to live, can bear almost any 'how'."

We now know that having a miserable childhood leads to increased risk of failure at school, mental health problems, offending behaviour, worklessness and other social ills. This can be directly linked to the disintegration of urban societies.

Planning and designing environments that bring people together are a critical factor of what should be happening to support wellness.

Society needs to do more to design spaces that allow people to come together and socialise.

THE
RISE
OF THE
CREATIVE
CLASS

Revisited

Creative Cities

People who can, exercise choice about place, based on...

- Liveable neighbourhoods
- Public space for public life
- Comfortable & effective transport

these things matter no less to those who cannot choose

OUR RESILIENT GLASGOW

A City Strategy Summary

Our Resilient Glasgow

A City Strategy Summary

What is City Resilience?

The capacity of individuals, communities, institutions, businesses, and systems within a city to survive, adapt, and grow no matter what kinds of chronic stresses and acute shocks they experience. Resilience is about building a stronger and more adaptable future for all Glaswegians.

What is 100 Resilient Cities (100RC)?

The Rockefeller Foundation marked its centenary in 2013 by inviting bids from cities around the world to be part of a network of 100 Resilient Cities. Glasgow submitted an application for membership of the network in October 2013. Glasgow was amongst 400 cities whose bids were assessed by a panel of internationally respected judges. The bid was successful and Glasgow's status in the first tranche of 32 cities was announced in December 2013. Since then, another 68 cities have joined the network.

This award has allowed Glasgow to appoint a Chief Resilience Officer, Alastair Brown, to lead the development of a resilience agenda for our city. It has provided benefits from engaging with peer cities from around the world.

Our Challenges

Glasgow is a resilient city. It has an extraordinarily rich history characterised by unshakeable strength and continuous reinvention in the face of shocks and stresses. Following the industrial revolution, the city took steps to diversify its economy and build a more attractive place its citizens. Moving into the future Glasgow faces different challenges, including climate change and economic uncertainty which must be addressed to ensure we become a more resilient city.

Glasgow is a **resilient** city with

Our major **challenges** include

1 in 7 Glaswegians
coming from an ethnic minority
background, the **most diverse**
population in Scotland

The largest student population
in Scotland, we educate over
130 000
students per year

3500 hectares
of green space and **91** public parks

13%
of all adult Glaswegians
holding **no formal qualifications**

58%
of residents living within
500m of derelict land,
double the national average

A population expected to grow
15%
over 20 years

£17 Billion GVA
generated to the Scottish
economy each year

The employment
levels currently growing
3.4%
a year

A rate of violent crime
2x the national
average

36%
of households
experiencing **fuel poverty**

1 Empower Glaswegians

Empower citizens and communities to strengthen their personal and collective resilience and work to mitigate systematic barriers that undermine it.

2 Unlock Place Based Solutions

Implement and support place based solutions to improve personal, community and economic resilience.

3 Innovate to Support Fair Economic Growth

Innovate to support fair economic growth that creates well-paid, accessible and meaningful opportunities for both businesses and Glaswegians.

4 Foster Civic Participation

Promote civic participation, trust and a resilience culture between Glaswegians and the institutions that serve them.

... keep it creative!

- In the knowledge age, the ‘best chance’ cities are in **super-city** competitive groups;
- **Super-cities** are characterised by:
 - concentration and the risk of coalescence;
 - compactness and resilience are key;
 - the ‘new urban agenda’ will focus on cities, their people and the INTEGRATION of services;
- In Europe, Glasgow performs well within its (self-selected) peer group in terms of **quality of life** and the experience economy;
- The **Glasgow Effect** is well-understood – the twin challenges of health and inequality are central to the city’s plans but should not dominate;
- Glasgow is well-placed and has the pre-conditions to develop a ‘creative ecosystem’ with creative production as a central part of the City’s strategy – but don’t overwork.
